

Natural Hair Loss Products

Revivogen

Revivogen is an all-natural hair restoration solution using natural DHT blockers. It can be used topically by both men and women and has no known systemic side effects.

Revivogen was formulated by a dermatologist using scientifically proven natural ingredients.

The main active have been scientifically proven to reduce the production of DHT by blocking the activity of the enzyme, 5-alpha-reductase. Other ingredients block the androgen receptors and stimulate hair growth.

By blocking lowering the concentration of DHT in the scalp, Revivogen helps to revitalize and protect the hair follicle. Topical application provides concentrated delivery to the hair follicle — where DHT is produced — without any systemic effects.

By decreasing the DHT levels and its destructive effects on the hair follicle, your own weakened hair can become thicker and stronger again, giving you fuller and healthier head of hair.

Publications

Gamma Linolenic Acid, Alpha Linolenic Acid, and Linoleic Acid

In the following studies, Gamma Linolenic Acid (GLA), Alpha Linolenic Acid (ALA), and Linoleic Acid were shown to be the most potent known inhibitors of type 1 and 2 forms of 5-alpha reductase and highly effective in decreasing the levels of dihydrotestosterone (DHT), when applied topically. More importantly this is accomplished without affecting any systemic effects.

The study further suggests that these fatty acids can be useful in the treatment of disorders related to dihydrotestosterone including male pattern baldness, acne, and excessive female body hair (hirsutism).

Azelaic Acid, Vitamin B6 and Zinc Sulfate

This article published in British Journal of Dermatology demonstrated that when Azelaic acid, Zinc Sulfate and Vitamin B6 where combined at very low concentrations, a 90% inhibition of 5-Alpha Reductase was achieved.

Saw Palmetto

In the following studies Saw Palmetto extract was shown to inhibit both type 1 and 2 forms of 5 alpha-reductase (Finasteride or Propecia® only inhibits type 2), was more potent than Finasteride and was able to effectively reduce binding of Testosterone and DHT to their receptors on various tissues. Please note that in the following studies Saw Palmetto Extract is referred to as Permixon or lipido-sterol extract of Serenoa repens (LSESr)

Procyanidin Oligomers

In the following studies Procyanidin Oligomers have shown to activate hair follicle growth.

Revivogen® Scalp Therapy

Revivogen contains natural ingredients that have been scientifically proven to reduce the production of DiHydro-Testosterone (DHT), block the androgen receptors and stimulate hair growth by:

- Natural DHT Inhibitors block Type 1 and Type 2 forms of 5-Alpha Reductase enzyme and reduce DHT production.
- Natural DHT Blockers shield the Androgen Receptors and prevent DHT attachment and uptake by the follicle.
- Activating and maintaining the hair follicle's growth phase.

Revivogen® Thickening Conditioner

Revivogen Thickening Conditioner is formulated to invigorate limp and thinning hair. It moisturizes and strengthens the hair shaft, adds volume and shine and creates thicker, fuller head of hair by using natural proteins that envelope the hair shaft giving it instant body and aiding hair restoration . By thickening the individual hair strands the scalp looks fuller and denser.

Nisim NewHair Biofactors

NewHair Biofactors is a Two Part Formula Treatment:

- a) Scalp Cleansing Shampoo
- b) Hair Stimulating Extract

Clinical testing revealed that 85.7% of subjects using NewHair Biofactors increased their hair count by at least 30%. This non prescription product has undergone Scalp Biopsy Studies conducted on humans with conclusive results.

Products Contains:

- Saw palmetto,
- amino acids (cystine, cysteine and methionine),
- B-vitamins (pantothenic acid, inositol and biotin) and
- natural vasodilators

Scalp Cleansing Shampoo

Deep-cleansing shampoo has been formulated to neutralize harmful Dihydrotestosterone (D.H.T.). It has been indicated by the manufacturer that the deep-cleansing shampoo will bring hair loss under control and contribute to a stronger, healthier follicle.

The majority of users notice a decrease in hair loss within 24-48 hours of using the product. The company also guarantees dramatic results in reducing hair loss within 1 week.

Hair Stimulating Extract

The Hair Stimulating Extract function by stimulating new hair growth.

Company provides 100% customer satisfaction guarantee – in this day and age this is quite the bonus.

Proguard

The purpose of this oral nuticeutical is to combat the effects of Androgenic Alopecia or both male and female pattern baldness.

Precautions:

Not intended for pregnant women or children.

Proguard acts by reducing DHT through blocking 5 alpha-reductase and thereby reduces hair loss and stimulates hair growth through natural additives. Result take up to 3 months and the treatment must be continued. Once treatment has stopped, hair loss will begin once again and return to its pre-state within 12 months.

Procerin

Procerin is a natural hair loss product that function by blocking the formation of DHT. Once the level of DHT has been reduced the hair follicle is able to grow normally and thus prevents unnatural hair loss and promotes growth.

Procerin can assist men of all ages and all degrees of baldness however the degree of improvement is consistent with the length of time this natural hair loss product is taken.

Improvement is mostly significant in men between 18 to 35 usually once hair loss is first noted. Therefore it works well for receding hair lines in scalp regions where there is still hair growth. In those men having more pronounced hair loss that has been evident for years, this supplement will help prevent further hair loss.

Because hair grows slowly (about 1 inch every two months) it is recommended that men use Procerin for at least 1 to 2 months before they should expect results. While some Procerin users do report improvement in only 2 weeks, most men take 1-3 months before significant increases in hair count occur.

Procerin is also backed by our 90-Day Unconditional Guarantee (no prescription medication offers this guarantee). If you are not completely satisfied, simply return your order for a full refund.

Product Contains:

- Saw Palmetto Berries,
- Gotu Kola,
- Nettles,
- Magnesium,
- Zinc Sulfate,
- Siberian Ginseng,
- Vitamin B-6,
- Pumpkin Seed Meal,
- CJ-11 Factor,
- CJ-9 Factor,
- Mura Puma Root

Additionally, all ingredients are pharmaceutical grade quality and processed under stringent quality control standards. No binders, fillers, or artificial preservatives are used in our tablets.
